

Peace of Mind is Top of Mind with IMPASSA

You want to do everything you can to protect your family and your home. A security system from DSC keeps a watchful eye on your family and other valuables when you are home and even when you aren't. It's peace of mind in one package. IMPASSA, the all-in-one security system from DSC, is so easy to use and has all the performance you need to protect what matters most.

What Wireless Means for You

Because the system is wireless, it installs quickly with minimal compromise to your home structure. Faster, easier installation means less installer time as well -- so you can get on with the business of your day.

Contemporary Design Blends into Décor

With a sleek and contemporary look, all DSC security devices project a modern feel and at the same time, inconspicuously blend into your home décor.

IMPASSA Security System

- Peace of mind in one small package • Quick professional installation
- Blends into home decor • Instant connection to emergency response • Easy to use

Control your System with Ease

Through the compact and sleek keypad, you control your security system with easy to use one-touch keys. The system can also be managed with a wireless key. It really is that easy!

Activating the Fire keys immediately sounds the siren, warning everyone inside, and transmits a signal to the monitoring station notifying them of the fire.

Triggering the Medical/Auxiliary keys immediately transmits an emergency signal to the monitoring station informing them of your medical emergency.

Pressing the Panic keys immediately notifies the monitoring station in an event of distress.

Stay

Stay Arm lets you secure the perimeter of your home and still move about freely inside.

Away

Away Arm allows you to protect your home when no one is present.

Chime

The Chime function notifies you through distinctive sounds when doors or windows are opened and closed. Different chimes can be assigned to different doors or windows.

Bypass

The Bypass function allows you to arm the alarm system with a door or window open; useful when you are home and decide to open a window to let in some fresh air.

Exit

The Quick Exit function allows you to exit a designated entry/exit zone without completely disarming the system; it is a convenient method to check the mailbox or let the dog out.

Instant Connection, With Back-Up, to Emergency Response

When an alarm occurs, a monitored IMPASSA Security System instantly connects to a monitoring station and emergency services are dispatched as required. For extra peace of mind, IMPASSA offers a two-way voice feature -- instant communication with your monitoring station. You can talk to a live operator who will dispatch emergency services as required. If an alarm has been activated, the system provides a listen-in feature enabling the monitoring station to assess the situation in your home. The listen-in feature is only active when the alarm is triggered.

Someone to Watch Over You

DSC's IMPASSA Security System keeps watch, providing you and your family security without compromise. Rest easy, knowing that IMPASSA keeps peace of mind, top of mind.

notes

It's important that your family is safe and sheltered at all times. The IMPASSA Security System, along with these sensors and accessories, provides reliable 24/7 protection and the peace-of-mind you are looking for in a monitored home security system.

IMPASSA. Protecting What Matters Most.
