Honeywell

Honeywell's Tuxedo Touch functions as a security and automation controller, video camera/recorder and more!

You can enjoy easy, fingertip control of Z-Wave® enabled thermostats, lighting and locks—even view and record video—right at the magnificent, 7" full-color touchscreen. You can even control your system on smartphones, tablets and other compatible devices.

Welcome to your connected business.

Intuitive, Intelligent System

Talk about convenience! You'll know how to use the Tuxedo Touch™ controller the first time you see it. It's intuitive, easy to learn and easy to use whether you're controlling security or automation, viewing and recording video or performing other functions on the touchscreen.

Security Made Simple

- Icons and words are easy to read, immediately recognizable and highly visible on the bright, crystal clear screen—reducing employee training time
- A press on the touchscreen is all it takes to access the event log, letting you easily:
  - Track which employees used the system and when
  - View openings and closings
- Easily assign or cancel employee user codes
- Opt for voice annunciation of alarm conditions*

Voice annunciation option available in English language only.

On-Premises Video Viewing and Recording

- You can view up to four indoor or outdoor IP cameras around your business on the touchscreen, smartphones, tablets or televisions
- Record up to two-minute video clips on an SD card— providing you with visual verification of an alarm event or system activity
- High-resolution 7" color touchscreen provides a great video viewing experience. View a single camera or up to four at one time.
- Supports up to 32 high-resolution IP cameras per system

Smart Server…Smart Business!

On-Premises Control

The built-in web-server allows you to locally control Tuxedo Touch™ anywhere in your facility on smartphones, smart TVs, tablets or any web-enabled device using your business' Wi-Fi® network.*

*On-premises control requires Ethernet or Wi-Fi network. Ask your installation professional for more information.

Energy Management and Savings

Through Scenes and Schedules

Thermostats

- Z-Wave® enabled thermostats* can automatically adjust every time you arm or disarm your security system, helping you save money and conserve energy
- Precise temperature control enables our thermostats to provide better workplace comfort, fewer temperature swings and conserve more energy**
- Lockouts can keep temperature limited to a minimum or maximum setting—ideal in environments when unauthorized individuals may attempt to adjust the thermostats

Locks

- Lock and unlock doors from Tuxedo Touch™ and disarm your security system through the keypad on your door lock
- Lock and unlock doors wherever you are on premises or automatically when arming or disarming the system

*Temperature available in Fahrenheit and Celsius.
**When used with Honeywell's ZWSTAT Thermostat

Lighting

Tuxedo Touch makes automated control of Z-Wave lighting a snap!

- Turn indoor and outdoor lights on or off every time your security system is armed—a great way to control costs and conserve energy when your business is closed and enter a safe, well-lit environment during work hours
- Program your lights to be randomized for an occupied appearance when you're away

Shades

Operate Z-Wave enabled shades in your facility for privacy and security by raising and lowering them at specified times. You can also reduce sun glare on computer screens and enhance workplace comfort. It's also a way to avoid needlessly heating the premises and incurring extra expenses.

Set the Scene

Scene Scheduling

Tuxedo Touch™ makes it easy to set scenes that occur on a regular basis through Z-Wave® technology—helping you save money and conserve energy. You can control the temperature so you don't waste money heating or cooling your business when you don't need to.

Sunrise/Sunset

Not only can you set scenes to occur at specified times, you can even have them respond to the sun! Your outdoor lights can turn on at sunset and off at sunrise, for example. Sunrise/sunset times update automatically and adjust for daylight savings. Whatever the season, your lights will come on when you want them to.

Event-Driven Scene Activation

You can combine sensors in Honeywell's VISTA® security system and Tuxedo Touch for event-driven scene settings. For example, if movement is sensed in a dark hallway, the motion sensor can trip a Z-Wave® light to come on automatically to light the way for an employee who is working late. This can increase employee safety while alerting you to activity at your facility.

Honeywell Total Connect™ Remote Services

Wherever you are, you can control your system and receive important alerts with Honeywell Total Connect on your smartphone, tablet or the same mobile devices you use every day.

Control and Manage Your System from Almost Anywhere

With Honeywell Total Connect, you can:

- Control your Z-Wave® enabled lighting, locks, thermostats and shades
- Receive notifications about important events in and around your business via email, text messages or video alerts
- Unlock doors for employees remotely
- Be alerted to floods, leaks and extreme temperature changes
- Know if merchandise, equipment, electronics or other valuables have been moved or disturbed
- View up to 100 sites with one login—great for franchise owners and businesses with multiple sites
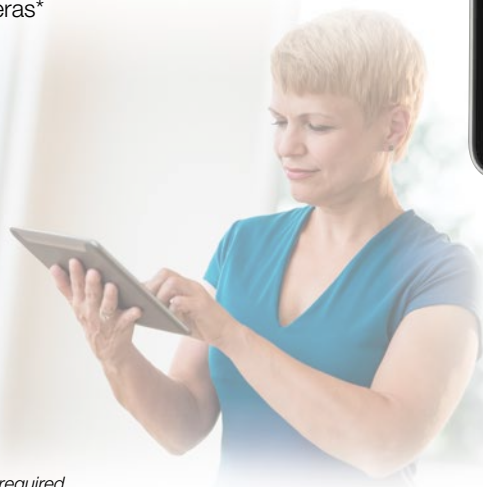

Same graphic icons as Tuxedo Touch!

Remote Video Viewing

View live video of the premises anytime, anywhere.

- Keep an eye on your employees
- Look in on your stockrooms, loading docks, cash registers, entrances, exits and other vulnerable areas
- View up to six cameras at a time*
- Monitor your business in low-light or dark environments with indoor low-light cameras*

*Honeywell Total Connect cameras required.

7

Dynamic Touchscreen!

The stunning, high-resolution touchscreen supports over 16 million colors! You can showcase products in vivid detail, advertise sales and special promotions and post employee announcements, floorplans and more.

Sleek, Stylish Design

The extra large screen and choice of white or silver housings are ideal in any commercial or industrial setting.

Picture the Possibilities

The security and business controller, digital picture frame, video viewer and recorder, and intuitive touchscreen are an unbeatable combination. Put Tuxedo Touch to work for your business today! Ask your security professional for details.
